GIRISH PANICKER

Enterprise Stability, Crisis Governance & Client Confidence Lead

98%	-30%	$100M+	17+
SLA / SLO COMPLIANCE	CRITICAL ESCALATIONS	PORTFOLIO MANAGED	YEARS LEADERSHIP

When enterprise systems fail, organisations call leaders like me. 17+ years of cross-functional leadership across Major Incident Management, Customer Success, Service Reliability Engineering and Global Operations - protecting revenue, restoring trust and sustaining growth at scale. Currently managing a $100M+ client portfolio across 400+ enterprise accounts on SaaS and AI platforms, delivering 98%+ SLA/SLO compliance and reducing critical escalations by 25-30% through structured governance and war-room leadership. Equally comfortable designing the operating model and building the systems that run it.

// 01 PROFESSIONAL EXPERIENCE

Kore.AI

Feb 2024 - Present

Manager - Customer Assurance, Reliability & Escalation

- Led P0/P1 Major Incident command and war-room execution for a 400+ enterprise client portfolio across SaaS and AI platforms within a 40-person global team, consistently achieving ~98% SLA/SLO compliance.
- Reduced critical escalations by 25-30% through structured RCA, Problem Management and Post-Incident Reviews.
- Drove MTTR reduction by overhauling incident lifecycle management, triage models and escalation pathways across distributed global teams.
- Owned end-to-end escalation management as primary escalation authority for C-suite and enterprise customer leadership.
- Governed Change Enablement and Release Management, materially reducing production risk and deployment-related incidents.
- Scaled 24x7 follow-the-sun operations with Engineering, SRE, Product and Infrastructure; implemented observability, alert tuning and automation.
- Managed a $100M+ portfolio - owning 10+ critical accounts, overseeing 50+ - driving churn-risk governance, recovery plans and executive alignment.

SYSTEMS BUILT & SHIPPED AT KORE.AI

TicketLens — SHIPPED - IN PRODUCTION

Support-operations platform for the Kore.ai support organisation - architected, built, shipped and operated solo. Unifies Zendesk, Jira, Confluence, Gmail, Chat and multi-provider LLMs behind one governed, audited system - now with two AI agents live in production.

8 analyst & leadership surfaces | 7 systems integrated | 2 in-app AI agents | 5-min data sync | 6 RBAC roles | OAuth + TOTP 2FA | CI/CD

ShiftLens — IN USE - INTERNAL

Shift roster, attendance, leave and allowance system for the Product Support team, replacing a manually maintained workbook. Allowances are derived from effective-dated rate tables rather than typed, so a closed month cannot be rewritten.

12,855 roster rows migrated | 0 historical totals changed | 4 self-service workflows | 24 integration tests passing

Open to global, hybrid and remote engagements

rtg.girish@gmail.com

Tata Consultancy Services
Oct 2021 - Feb 2024

Associate Consultant - Incident, Change & Problem Management

- Sole incident and change management lead for a critical global manufacturing client, managing ~50 incidents/month and improving resolution efficiency and SLA adherence by ~15%.
- Reduced repeat incidents by ~20% via structured RCA, Problem Management and Continuous Service Improvement.
- Strengthened Change and Release Governance, reducing deployment-related disruption across enterprise production environments.

Cloud4C Services Pvt. Ltd.
May 2020 - Oct 2021

Service Assurance Manager

- Led Incident Management, Escalation Handling and Service Assurance across 120+ enterprise clients, delivering consistent SLA/KPI performance.
- Implemented Change and Release Governance frameworks, reducing production risk and incident leakage.
- Developed runbooks, playbooks and rollback strategies ensuring deployment readiness and operational resilience.

Career Transition Period
Jul 2019 - Apr 2020

Targeted Job Search & Professional Development

- Focused period of targeted career search, skill development and industry networking following a strategic role transition.

Stanley Black & Decker
Dec 2015 - Jul 2019

Sr. Project Management Analyst

- Delivered large-scale system decommissioning and migration programmes with zero critical compliance gaps using Agile/Scrum methodologies.

IBM India Pvt. Ltd.
Feb 2015 - Dec 2015

Service Delivery Analyst

- Managed IAM operations, access provisioning, compliance audits and access-related incident resolution with proactive RCA initiatives.

Dell Technologies
Jun 2006 - Feb 2014

Business Analysis Analyst

- Managed application lifecycle and operational stability for financially critical enterprise systems across an 8-year tenure, ensuring high availability and minimal business disruption.
- Led escalation management for high-severity incidents on business-critical applications, driving swift resolution and minimising financial impact.
- Partnered with internal audit on SOX compliance reviews, access control governance and risk framework strengthening.

// 02 PERSONAL PRODUCT INITIATIVES

Sentinel Grid
CONCEPT

AI-powered emergency response platform. Conceptualised a real-time intelligence layer for autonomous incident detection, AI-assisted triage and unified multi-agency coordination for smart-city and public-safety markets; owned strategy, workflows, UX principles and the resilience roadmap.

Product strategy | Go-to-market vision | Scalability roadmap

Invest IQ
CONCEPT

AI-powered investment intelligence platform. Defined an agentic product for autonomous portfolio analysis, real-time market signal detection and adaptive asset classification, with investor onboarding journeys, risk-scoring frameworks and predictive return models.

Product vision | Risk-scoring frameworks | Adaptive strategy design
